My interests

- My research is focused on a variety of topics, including:
 - Mining software repositories
 - Specially git
 - Provenance of software artifacts
 - Source code
 - Intellectual property in software engineering
 - Specially as it applies to open source
 - FOSS software engineering
 - Leverage successful practices in open source,
 - such as code reviews, git workflows

What do I expect from the workshop?

- I want to learn what others are doing
- What is the future of mobile release engineering?
- Start new collaborations
- Develop some new ideas for future research
